

Lifting Frame

The Packline lifting frame is designed to handle reels of film and material. It is designed so that the frame is opened and the reel is rolled on to the platform. The frame is then closed and the reel is safe to manoeuvre to the required destination for unloading.

This popular solution is simple to use, turning what is often a two man operation into a one man job that is safe and efficient reducing crucial down time to your production process.

Please do not hesitate to contact Packline for further information regarding this design on 01202 307700 or via our web site at www.packline.co.uk

Technical Specification

Maximum Capacity = 65kg - for this particular design
Capacities of up to 250kg can be achieved depending on the application

Load Centre = 604mm from column - for this particular design

Attachment Mass = 24kg

Main Materials = Stainless Steel 304, Aluminium 6082T6, Delrin
