

Barrel Lifting and Rotating Clamp Attachment – Motorised / Geared / Manual

The powered Stainless-Steel 'Compac' Lifter when fitted with the Barrel Lifting Attachment can be used to handle a wide range of barrel types and sizes.

The barrel lifting attachment has been designed to grip barrels by the circumference and rotate to any position through 360°.

Packline's range of barrel lifting attachments are fully interchangeable and can be easily fixed or removed from any model of 'Compac' Lifter, suitable for clean room environments such as the Food, Medical and Pharmaceutical Industries.

Specifications:

- Ideal for use in clean room environments.
- Available as Manual/Geared/Powered Rotation.
- Loads capacity up to 300kg.
- Interchangeable Jaws with a range of pre-shaped pads enable the right solution can be specified for each individual Barrel Lifting application.
- Suitable for load diameters of up to 850mm as standard.
- Built in Slip Torque mechanism to ensure correct gripping pressure is applied preventing over tightening and damage to load.

The attachment is backed up by a fully bespoke design service, ensuring the right solution can be made to suit most requirements and applications.
